

ICC EXPERT SERVICES

Finding the right Experts and providing support in Expert proceedings

ICC can find Experts that will provide clients with independent opinions and advice on technical, financial and legal matters.

Experts often act as witnesses, solve differences and help parties ensure that their contracts are properly performed. Experts can also serve as Neutrals, (e.g. Adjudicators, Dispute Board Members and Independent Engineers.)

The ICC International Centre for ADR has unique experience in identifying Experts and Neutrals on all continents and from all disciplines, including engineering, energy, finance and law. Companies, states, and state entities regularly turn to the Centre due to the efficient response to their requirements.

ICC Expert Services offer the best professional practices and include safeguards to ensure competency, independence, impartiality and availability of experts.
