ICC and the International Federation of Consulting Engineers (FIDIC) will hold their annual ICC-FIDIC Conference in São Paulo, Brazil. The event, which gathers the world’s leading construction practitioners, aims to provide participants with an update of the latest industry trends and developments, deliver real-world insight and specialist knowledge, as well as offer an exclusive networking platform for the international construction community.
The International Court of Arbitration is the world’s leading arbitral institution. Since 1923, it has administered over 24,000 cases and has helped resolve difficulties in international commercial and business disputes to support trade and investment.

The Court provides parties with a flexible and neutral setting for dispute resolution. It offers confidentiality and extraordinary freedom for parties to choose the framework for how and where they want to resolve their dispute. While the dispute itself is resolved by independent arbitrators, the Court supervises the process from beginning to end, increasing the quality of the process and enforceability of the awards.

Members of the ICC Court are appointed by the ICC World Council on the proposal of national committees and groups. To date, the Court has 176 appointed Court members coming from 116 jurisdictions.

The Court’s Secretariat, headed by a Secretary General, comprises a permanent staff of more than 120 lawyers and administrative staff of 35 different nationalities who speak as many languages.

The Secretariat is divided into case-management teams, seven based in Paris, one in Hong Kong, one in New York, one in São Paulo and another one in Singapore.

FIDIC

FIDIC is the French acronym for the International Federation of Consulting Engineers. It was founded in 1913 to promote the professional interests of member associations and to disseminate information of interest to members of its constituent national associations. FIDIC membership represents over one million engineering professionals and 40,000 firms in more than 100 countries worldwide.
